https://daffafirasyan.vercel.app/ | Bandung, Indonesia

Fresh graduate in Information Systems from Telkom University with a strong interest in Full Stack Development, Artificial Intelligence, and Data Analytics. Experienced in developing frontend and backend applications using PHP, Python, C#, and modern web frameworks, as well as implementing AI solutions using RAG and KG-RAG. Skilled in database management, REST API development, and building data-driven applications. Passionate about developing scalable digital solutions, solving complex problems, and continuously expanding technical expertise.

WORK EXPERIENCE

Telkom University Bandung, Indonesia
Freelance Fullstack Developer June 2025 – January 2026

- Developed a monolithic web application using Laravel (PHP) integrating a Village Profile portal with an E-Commerce module to support public transparency and local MSME empowerment.
- Built a CRUD-based Admin Panel for managing news, multimedia galleries, organizational structures, and dynamic website content.
- Developed a product catalog with search and category filtering, including an Excel Import feature for efficient bulk product data management.
- Designed and implemented interactive statistical dashboards to monitor daily visitor traffic, most-viewed products, and content performance metrics.
- Deployed and configured the application on Hostinger, including domain setup, production configuration, and database optimization.

PT Pertamina Hulu Indonesia Jakarta, Indonesia
AI Fullstack Developer Intern July 2025 – August 2025

- Designed and developed an AI Chatbot Assistant using Microservices architecture to centralize information from over 350 internal company portals.
- Developed the core backend using .NET Core 8 for business logic, API management, and data orchestration.
- Designed a relational database using Microsoft SQL Server to manage website data, knowledge base documents, and chat session history.
- Developed a Python/Flask microservice for document processing and NLP tasks, implementing RAG and Sentence Transformers for semantic search using vector embeddings.
- Built a standalone Admin Dashboard and reusable Chatbot Widget using Vue.js and TypeScript for knowledge base management and integration across internal websites.
- Implemented end-to-end integration between document upload, vector processing, backend services, and the chatbot interface.

PT Sinar Harsa Grasia Jakarta, Indonesia (*Remote)*
Fullstack Developer Intern November 2024 – April 2025

- Developed a web-based farm management application integrated with real-time IoT systems to support livestock activity monitoring and farm data management.
- Designed and developed the backend using Django to manage user data, farm records, and integration with connected IoT devices.
- Developed responsive and user-friendly frontend features using HTML, CSS, and JavaScript to support efficient access to farm management functions.
- Integrated IoT sensor data into the web dashboard, enabling users to monitor livestock activity and manage multiple farm locations across Indonesia in real time.
- Implemented REST API, MQTT, Celery, and Redis to support communication, data processing, and background task management.

ORGANIZATIONAL EXPERIENCE

Enterprise Infrastructure Management Laboratorium July 2024 – July 2025
Human Capital Developement Staff

- Managed social media platforms to improve organizational visibility, creating content that promotes EIM initiatives and engages both internal and external audiences.
- Supported HR activities such as recruitment processes, employee development programs, and performance evaluations to align with organizational goals.
- Contributed to the design and implementation of internal communication campaigns, fostering a collaborative and productive work environment.
- Utilized social media analytics to measure and improve the effectiveness of communication strategies, ensuring alignment with the organization’s objectives.

Perhimpunan Mahasiswa Bandung October 2024 - June 2025

External Division Staff

- Developed and maintained professional relationships with external organizations, including student associations, local businesses, and community partners.
- Coordinated strategic collaborations and external events to enhance the organization's visibility and engagement.
- Managed communication with external stakeholders to strengthen and promote the organization's presence within and outside the university.
- Gained experience in networking, stakeholder management, and project coordination.
- Contributed to outreach initiatives and supported partnership-driven projects, ensuring alignment with organizational goals.

Central Computer Information December 2023 – December 2024

Media Management Staff

- Managed content across various platforms, ensuring consistent messaging and alignment with organizational goals.
- Collaborated with cross-functional teams to promote initiatives, events, and digital solutions within the university community.
- Enhanced brand visibility by creating engaging multimedia content and leveraging analytics to optimize media campaigns.
- Gained experience in content planning, digital marketing, and media outreach, contributing to the overall success of the organization's communication efforts.
- Led media strategies for UKM projects, focusing on content creation, social media, and public relations.

EDUCATION

Telkom University Bandung, Indonesia

Bachelor of Information Systems, 3.65/4.00 August 2022 – August 2026

- Graduated with Cum Laude honors.
- Final Project: Developed an LLM-based Decision Support System using RAG and KG-RAG for explainable and traceable asset maintenance recommendations, achieving a 4.73/5 overall evaluation, 92.9% procedure match, and 39/39 functional tests passed.
- Presented the research paper "A Controlled Comparative Study of RAG and KG-RAG for Explainable Asset Maintenance Recommendations" at ICADEIS 2026 and published it in the IEEE Xplore Digital Library in August 2026.

TRAINING & CERTIFICATIONS

- **Artificial Intelligence with Machine Learning in Java** — *Oracle Academy,* June 2026
- **Web Developer** — *BNSP*, November 2025
- **Junior Web Developer** — *BNSP*, November 2025
- **English Proficiency Test (EPrT)** — Telkom University, November 2025
- **JavaScript (Intermediate)** — *HackerRank***,** August 2025
- **REST API (Intermediate)** — HackerRank**,** August 2025
- **SQL (Advanced)** — *HackerRank***,** August 2025
- **Frontend Developer (React)** — *HackerRank***,** August 2025
- **Low-Code ERP Training for Software Developers** — 1Ci, February 2025

SKILLS

- **Languages:** Indonesian (Native), English (Intermediate, CEFR B1)
- **Soft Skills:** Interpersonal Skills, Communication, Creativity, Critical Thinking, Problem Solving, Teamwork & Collaboration, Time Management, Organization
- **Hard Skills:** Fullstack Development, Web Development, Database Design, Data Processing, Data Integration, Data Analytics, Data Visualization, Data Mining, Data Warehouse, ETL, Business Intelligence, Microservices Architecture, Clean Code, REST API, NLP, Vector Embeddings, Knowledge Graphs, RAG, KG-RAG, LLM, SQL
- **Programming Languages:** JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS, C#
- **Frameworks & Technologies:** Laravel, .NET Core 8, Django, Flask, FastAPI, Node.js, Vue.js, React.js, Next.js
- **Database & Data Tools:** MySQL, Microsoft SQL Server, PostgreSQL, Metabase, Looker, Pentaho, MongoDB
- **Development & Deployment Tools:** GitHub, Docker, Vercel, Hostinger, Swagger UI, Postman, Visual Studio Code, Visual Studio
- **Development & Project Management:** Jira, Visual Paradigm, Oracle VirtualBox, Slack, Figma
- **Productivity:** Microsoft Excel, Microsoft Word, Microsoft Powerpoint
